YOUR PATH IS WRITTEN IN THE CARDS

A platform for tarot readers, astrologers and numerologists

AstralFate connects specialists and clients: free readings bring people in, and paid consultations with protected payment earn the specialists money.

NOT JUST A DIRECTORY OF FORTUNE TELLERS

It is a marketplace with free tools, fair payment held in escrow, a chat and disputes — everything so the client trusts and the specialist is paid for the work.

WHAT THE PLATFORM GIVES

Attract

free readings and tools bring visitors in

Earn

paid consultations with payment that doesn't get lost

Trust

money is protected; a moderator settles disputes

The platform runs within agreed limits and a chosen level of activity. The result is a working product, not a promise of guaranteed success.

THE PROBLEM

Free brings people in, paid earns the money

People happily try a free reading, but they hesitate to pay a stranger online.

Free tools

A reading in 10 seconds with no sign-up, a destiny matrix, a natal chart, a card of the day and a horoscope. They bring traffic and show how good the specialists are.

Paid consultations

Specialists sell readings and answers. This is the platform's main income — and exactly where the client must not lose money.

The barrier is trust

The client fears paying and getting no answer. The specialist fears doing the work and not getting paid. Without a fix, both sides leave.

The AstralFate fix

Money is frozen on payment and reaches the specialist only after the client confirms. A moderator settles disputes, seeing the whole conversation.

HOW A VISITOR MOVES

1. Arrives for a free reading
2. Sees specialists, services and honest reviews
3. Pays for a consultation — the money is protected
4. Gets the answer and confirms — the specialist is paid

The free value stands on its own, and the paid side is protected by structure. That is why both the client and the specialist stay on the platform.

HOW IT WORKS

Fair payment and disputes in one conversation

The deal, the payment and the dispute all live in the same chat where the two sides talk.

Service offer

The specialist posts a service with a price and a timer right in the chat. The client sees what they pay for and agrees in one tap.

Money held

Payment doesn't leave at once: the money is frozen and waits. The specialist works knowing the payment is already in and won't vanish.

Confirmation

The client gets the answer and confirms. Only then does the money reach the specialist. If something is wrong, a dispute opens.

DISPUTES AND MODERATION

If the service wasn't delivered, the client opens a dispute. A moderator joins the same conversation, sees the deal's history and decides who gets the money back. They write anonymously as “Moderator”, and both sides see the message in their own chat.

Admins may close their own disputes and payouts by their own rules — payouts stay manual on purpose, as protection against fraud.

- Chat, deal and payment in one place — nothing gets lost
- A timer and a fixed price: no “pay me more later”
- A dispute is settled on the record, not on one side's word

WHAT'S INSIDE

Tools, catalog, payment, support

Free calculations bring people in, and everything else helps them stay and pay.

Free tools

Tarot readings, a destiny matrix with a forecast by life periods, a natal chart, a card of the day and a horoscope, the Tree of Life, a guide to all 78 cards and articles.

Specialist catalog

Tarot readers, astrologers and numerologists with services, prices and reviews — reviews come only from people who actually paid for a consultation.

Payment

Three ways: cards and SBP via Robokassa, crypto via NOWPayments and a manual transfer. The money goes through escrow until confirmed.

Support and cabinets

A support desk with tickets — even guests without an account can write. Client, specialist and admin cabinets with money charts.

ALSO ON THE PLATFORM

- Its own mail server — letters get delivered, 9.6 out of 10 on mail-tester
- SEO and structured data so the free pages are found in search
- Three interface languages: Russian, English and Bulgarian
- A native mobile app for Android

TRUST AND SAFETY

Money protected, code under review

The platform is built around trust — in the money, in the reviews and in the service itself.

MONEY PROTECTED

Payment is frozen and reaches the specialist only after the client confirms. A moderator settles a dispute by the deal's history.

HONEST REVIEWS

Only someone who paid can leave a review. So a specialist's rating reflects real work.

REVIEWED CODE

A full security audit before launch. Every update checks itself and rolls back if the site didn't respond.

4,000+

free readings a month bring people in

3

payment methods: cards and SBP, crypto, transfer

100/100

on every Google PageSpeed metric: speed, SEO, accessibility

2 mo.

from the first line of code to launch

UNDER THE HOOD

Rust (axum), PostgreSQL, WebAssembly and WebSocket. 1,194 automated tests and 117 database migrations. The payment systems, the mail server and the chat are our own, with no third-party builders. Updates ship with one command and an automatic rollback.

That means the platform can be grown and fixed fast without breaking what already works for clients and specialists.

IN SUMMARY

Free brings people. Paid is protected. The platform grows.

AstralFate isn't a directory — it's a working economy of trust between client and specialist.

What the client gets

A free reading in 10 seconds, a choice of specialist by honest reviews, and payment that won't disappear: money leaves only for work that was done.

What the specialist gets

A flow of people from the free tools, payment that is already in and waiting, and a platform that protects them from non-payment.

WHO THE PLATFORM IS FOR

For tarot readers, astrologers and numerologists who want to sell consultations fairly and without the risk of non-payment, and for their clients, who need to get an answer and not lose money. The interface is in Russian, English and Bulgarian.

The free tools stand on their own — you can use them without buying anything.

The result for the owner

A flow of clients. Fair payment. Trust built into the mechanics.

You can start with a free tool and add paid consultations once the platform brings people in.
